

# Multi-Theme Targeting

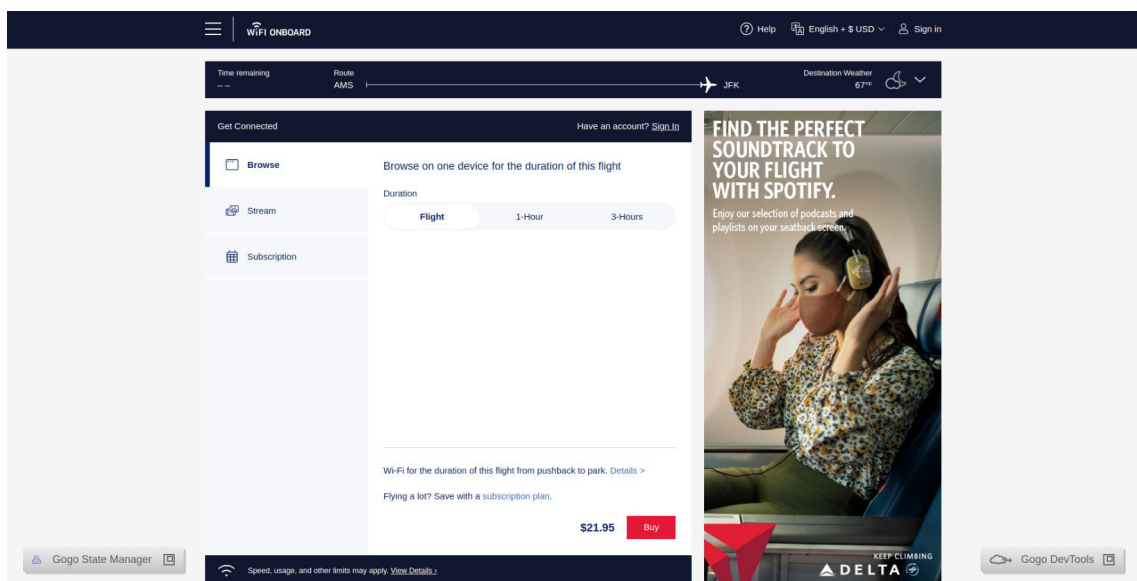

- Multiple themes with multiple targets can be dynamically updated with this feature implementation.
- One theme can have multiple targets and based on the priority of the targets, the theme will be applied for that tail
- We can change the complete theme based on the conditions but for this demo i have changed only background color
- Themes will be applied based on queue datastructure(FIFO)
- Targeting Parameters
  - Route
  - Tech
  - Tail
  - Date Range

## Flight Info :

- Tail Number : 0DLST2
- Tech : 2KU
- Route : EHAM-KJFK

# Default Theme

- Background Color : Black

# Multi-Theme Targeting Applied

- Background Color : Blue
